MEETINGS OF SCIENTIFIC BODIES

To be held during the ensuing week.

TUESDAY, Jan. 15.—Institution of Civil Engineers, 8 p.m.
WEDNESDAY, 16.—Society of Arts, 8 p.m.
THURSDAY, 17.—Royal Society, 8½ p.m.; Society of Antiquaries, 8 p.m.; Royal Academy, 8 p.m.

TO CORRESPONDENTS.

"*Water Tanks.*"—Will some of your readers tell me a cheap and efficient way of making water tanks—size, 35 feet by 15 feet? Fire bricks built with Roman cement are recommended, but perhaps they can point out a better plan, with a covering for same.—B.

"*Lowe's Stench Trap Grid.*"—With reference to our notice of this, Mr. S. S. Rawlinson has favoured us with a letter, showing that cast-iron stench traps, similar in principle, have been used in his town (Nottingham) for twenty years.

"W. d'E." (we are flattered by good opinion; the only objection we have to complying with the request is our personal connection with the building; it shall not be lost sight of, however). "*Vitus Ecclesiæ*" (shall appear). "R. D." "E. P.A." "G. C." (we have not time to refer). "T. L. W." (we shall be glad to receive news). "One of the Duped." "R. A." "W. W." "G. P." and "J. G." (publisher will write). "J. M." (inquire at Registerer's, Somerset House). "Copyism" (the paragraph last week thus headed being signed B., and referring to Brandon's "Analysis," the author of that work wishes us to mention that it was not written by him). "Lady B." (next week). "J. M." "A." (we do not know; he would learn at the Registrar's office). "B. B." (shall hear from us). "P. C. H." (send us particulars; we are disposed to engrave it). "Jno." Sheffield (write to the secretary of Institute, 16, Grosvenor-street, London)." "G. W." "J. J. L." (shall hear). "A Bart." "R. N." (please call in York-street). "E. B." "J. H., jun." "X." "J. L." Manchester. "A. Z." "Junius." (Messrs. F. and G. are the architects; we will inquire into the fact mentioned). "J. B." (the knotting alluded to is insoluble in water; the manufacturers, by whom the letter was written, decline to state its composition). "M. Bro." (your letter was simply a personal advertisement, then?). "T. L." "B. and M." "J. J. (shall appear)."—"A Treatise on the Progress of Decorated Window Tracery," by Edmund Sharpe, M.A., architect (London, John Van Voorst); "Churches of the Middle Ages," (Part IV.); "Bradshaw's Railway Directory, Shareholders' Guide and Manual (Adams, London; and Bradshaw and Co., Manchester).

NOTICE.—All communications respecting *advertisements* should be addressed to the "Publisher," and not to the "Editor;" all other communications should be addressed to the EDITOR, and *not* to the Publisher.

"*Books and Addresses.*"—We have not time to point out books or find addresses.

ADVERTISEMENTS.

TWO CONSUMERS of PLASTER of PARIS. —The Advertiser is in a position to supply the above article in quantity at extreme low rates.—Particulars may be had on application.—Address, W. B. WILKINSON, Plaster-street, Newcastle-on-Tyne.

GREAVES'S BLUE LIAS LIME, WARWICKSHIRE CEMENT, BLUE LIAS FLAGGING STONE, and MARBLE WORKS, WARWICK. Agents—Messrs. Remy and Verry, 8, South Wharf, Paddington; Messrs. Hallidays, Pudding-lane, London; Mr. J. Thompson, Back Kingstreet, Manchester; Mr. T. Wylie, 1, Royal Bank-buildings, Liverpool; Mr. J. Harrison, Linenhall-street, Chester; Mr. T. E. Myers, 108, Furnival-street, Sheffield; Mr. J. Bonehill, Berkley-street, Birmingham; and can be delivered by the Proprietor's own boats to any part of the kingdom.

ATKINSON'S CEMENT.—This Cement has hitherto been manufactured in Yorkshire, and through long detention at sea, has often proved stale and unfit for use on its arrival in London. By the arrangement now made, the Cement will be manufactured in London, and thus preserved in consequence in a fresh and genuine state, by the sole Agents, J. B. WHITE and SONS, Millbank-street, Westminster.

KEENE'S and PARIAN CEMENTS, for internal stucco, are employed very advantageously in place of wood for skirtings, architraves, and panel mouldings, and for in-door fronts, instead of stone. The peculiar properties of PARIAN Cement allow of its being painted or papered upon about a few hours of its application, and thus render it an important substitute for common plastering in those cases where addition and beauty of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement, Literature of PARIAN Cement.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement, but has the advantage over that material of wholly resisting frost. When used as a stucco it does not cement or turn green in damp situations, and requires no colouring. Employed as an hydraulic mortar for brickwork, it carries four times its measure of sand to one of cement, and is proved by trial to become harder and stronger in those proportions than Roman Cement with but one measure of sand. This superior cementing power, combined with its eminently hydraulic properties, puts it out as the fittest material for building sea and embankment walls, the lining of reservoirs, cisterns, and baths, and for all those purposes where strength and a perfect resistance to water are required.

Manufactories—J. B. WHITE and SONS, Millbank-street, Westminster, and 26, Seel-street, Liverpool.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, (late of Patentee.—Messrs. RODINS, ASPDIN, and Co. request reference to No. 238, page 481; and also Nos. 244 and 263, pages 41 and 251 of "The Builder," for accounts of EXPERIMENTS to the strength of Portland Cements, whereby the great superiority of their Cement is manifest. This Cement has been proved for upwards of twenty years in the Thames Tunnel to resist the action of water; it is stronger in the cementitious qualities, harder, and more durable than any other description of cement; it does not vegetate, corrode, or turn green; nor is it affected by any atmospheric influence whatever the climate, resisting alike the action of frost and heat. It is manufactured to set in from five to sixty minutes. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. RODINS, ASPDIN, and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall; and by their Agents at the Depot, 1, Back Gores, Liverpool.

MARTIN'S PATENT FIRE-PROOF and ORNAMENTAL CEMENT—REDUCTION of PRICE.—The Proprietors have to inform their Friends and the Public that they have made arrangements which enable them to offer this valuable cement at a considerably reduced price. It has now been before the public so many years, and has obtained so high a standing in the estimation of all who have used it, that it is unnecessary to comment on its merits. The Patentees, however, feel it right to observe, that by its use—from the greater amount of work which a given quantity will cover, and the small amount of labour required in working it, a saving of 20 to 30 per cent. is effected as compared with other cements for internal use. Specimens showing its beauty, hardness, and applicability to all plain and ornamental purposes, may be seen; and the Cement in any quantity obtained of the Patentees, Messrs. STEVENS and SON, Cherry Plaster and Cement Works, 188, Deverp-lane, London.—Agent for Liverpool.

GEORGE NEWTON, No. 6, Leviton-street, Bold-street,

EMERSON'S PATENT LIQUID CEMENT is ready for use, in any tint in the manufacture, and only ONE-EIGHTH the cost of oil paint; for beauty it is pre-eminent over all other materials used on the fronts of houses, giving the exact appearance of FINE CUT STONE; can be used at once on fresh Roman cement or other plastering; is particularly calculated for country houses, villas, or gate entrances that have become soiled or dingy, which can be beautified in any weather, at a trifling cost.—Sold in casks of 7, 14, and 28 each, at 8s., 16s., and 32s each.—G. BELL and Co., 14, Bunhill-row, Cheapside.

THE PARIAN CEMENT, for INTERNAL STUCCO, which was exhibited at Messrs. J. & R. MORLEY'S warehouses and dwelling in Wood-street, Grosham-street, in the City, has been used throughout the premises, in every story; altogether about ten thousand yards superficial, chiefly upon recently built walls, and a small portion upon timber partitions, and that with the most perfect and satisfactory result. I find it also necessary to observe, that the plasterer's work was almost invariably followed up on the next day by the painters, thereby enabling me to have the buildings completed in the shortest possible time, both for business and for the accommodation of the establishment. Mr. Emerson, of opinion, that the use of this new material for such extensive purposes in building operations and fully justifies that which I was given to understand, viz., that it was an extraordinary material. I think it right to mention that I am at the present time having agreed extent of similar work executed at another range of buildings, where time and the quality of the work are of the utmost importance.
(Signed) JNO. WALLEN, Architect, London.
To Messrs. Chas. Emerson and Sons, Manufacturers, Nine Elms.

TO THE NOBILITY, GENTRY, ARCHITECTS, BUILDERS AND OTHERS.

T. FAIRS, 139, New Bond-street, begs leave to inform them that he has a large assortment of stained and figured quarries on hand, and that he can execute stained glass quarry glazing for churches, &c. at one third less than the usual trade price.—A very fine PAINTED CHURCH WINDOW, in six compartments, each 9 feet 3 inches high, and 2 feet 8 inches wide, consisting of the four Evangelists, St. Peter and St. Paul, TO BE SOLD at a cheap rate. Also various pieces of old Painted Glass.—Two very handsome CARVED STATUARY CHIMNEY PIECES, TO BE SOLD a great bargain. Any gentleman wanting such things, should not miss the opportunity of seeing them at the above address.

FAIRS and CO'S PATENT VENTILATORS are strongly recommended by the faculty: they still be found a very great preservative to health in being applied to bedrooms, in all shops and confined towns, supplying plenty of pure air, without the annoyance of the cold draft. They can be found most serviceable where gas is introduced into the houses, and a very great preventative to cholera and all epidemic diseases.—Orders sent to the above address, or to the Manufactory, 13, Gillingham street, Pimlico, will be punctually attended to.

REDUCED PRICES.—EDWARD SIMMS (late William Cleaver), of Wilson-road, Pimlico Basin, begs to acquaint Builders and the Trade that he has now on hand, at his Manufactory (the first of its kind ever established), a very large Assortment of Dry and Well-seasoned OAK and DEAL PREPARED FLOORING BOARDS and MATCH BOARDING of all sorts, from ¼ inch to 1½ inch thick, planed to a parallel width and thickness, and as originally designed. Prepared Deals, Battens, Beads, Oak Planks, Scantlings, Sash Sills, Mouldings prepared by Machinery, Laths, &c.—Apply at E. SIMMS'S late W. Cleaver's Flooring Manufactory, Wilson-road, Pimlico Basin.

FLOORING.—ALFRED ROSLING begs to inform his customers and the trade generally, that he has again very materially REDUCED the PRICES of his DRY FLOOR BOARDS, of which he has in stock an extensive manufacture. To purchasers of a quantity of freshly prepared boards A. R. is able to offer a great reduction upon the current prices, to avoid the expense of pilling away in the drying sheds. Mouldings in great variety, and prepared in a very superior manner.—Southwark-bridge Wharf, Bankside, October, 1849.

THOMAS ADAMS, Mahogany and Timber Merchant, Commercial New road, Southwark, near the Bricklayers' Arms, is SELLING SEASONED FLOORING at LESS PRICES THAN ANY ADVERTISED; also matched boards and mouldings prepared from the very best materials, and in a superior manner. TO ARCHITECTS, BUILDERS, UPHOLSTERERS, AND OTHERS.

WOOD CARVING done in the cheapest and best manner. Estimates given to any amount. Pulpits, reading-desks, altar-rails, stalls, and other church furniture supplied complete. Old carvings restored by J. FEALEY, Wood Carver and Manufacturer, 42, Berwick-street, Soho, London.

JORDAN'S PATENT MACHINE CARVING and MOULDING WORKS for WOOD and STONE, Belvedere-road, Lambeth, and 194, Strand.—TAYLOR, WILLIAMS, and JORDAN beg to call the attention of the building community to a new feature of their establishment, and, at the same time, to thank their numerous patrons and friends for the very liberal support they have lately experienced, which, they assure the public, it will be their constant endeavour to deserve, by giving their customers an increasing share of the advantages arising from the constant improvements in the machinery which they have just succeeded in applying to the production of the most intricate carving in Caen and other freestones, and in statuary marble.
Messrs. W. and J. particularly solicit the attention of architects and builders to the fact that, by the use of this machinery, a very large saving, both of time and money, is effected.—as a result, indeed, that in many cases they can deliver a well-finished article in Caen stone for less money than if rough to be obtained in London their hard-carving will, in some cases, be found to come into close competition with the best kinds of composition ornament.—For prices and estimates apply at 194, Strand.

TESTIMONIAL FROM CHARLES BARRY, ESQ.
"Westminster, May 16th, 1849.
"Gentlemen.—In reply to your letter requesting my opinion of your recent Carving Machinery, I have much pleasure in stating, from an experience of more than two years, in its application to the production of the wood carvings of the House of Peers, and other apartments of the New Palace, at Westminster, that I am enabled to make the most favourable report concerning it, and to add that it has more than justified the favourable terms in which I recommended it to be laid before her Majesty's Commissioners of Works for adoption.—I remain, Gentlemen, yours faithfully,
"CHARLES BARRY."
Messrs. Taylor, Williams, and Jordan."

SNOXELL'S PATENT SAFETY REVOLVING WOOD SHUTTERS, Manufactory, 98, REGENT-STREET and 181, CHANCERY-LANE. Patent sealed on the 8th day of February, 1848, for Fourteen Years, for Improvements in Revolving Shutters of WOOD and IRON, consisting of Six Methods of Hanging and Lowering Shutters, without Machinery, and Two for Hinging and Strengthening the Edges of Wood Laths with Iron.—The Patentee having fixed up some hundreds, will feel pleased in forwarding the Testimonials of Architects, Principals of large Establishments, and others, having them now in use, which fully guarantees the Patentee in stating they are beyond dispute superior to any other Revolving Shutter for durability, security, and simplicity, without the use of cog-wheel worm and screw gear, or any other complicated machinery employed by other makers.

BUNNETT and Co., ENGINEERS, Patentees and Manufacturers of REVOLVING IRON AND WOOD SAFETY SHUTTERS, and of ORNAMENTAL SASH BARS, MOULDINGS, STALL-PLATES, &c. FOR SHOP-FRONTS, AND OTHER WINDOWS, OR ENCLOSURES, IN BRASS, COPPER, ZINC, IRON, &c.
Shop-fronts completely fitted up and glazed with best plate glass. Metal works and improved machinery of all kinds for warehouses, hatters' houses, &c.
BUNNETT and Co. challenge competition as to either quality or price.
Office, 26, Lombard-street, London; Works, Deptford, Kent.

B. and Co. are also Patentees and Manufacturers of Improved Bench and Floorlay Cramps for Builders; Wrought Iron Diagonal Gratings, doubly-trapped self-acting Water Closets, and self-acting and self-cleansing Effluvia Traps, for Sewers, Drains, &c. &c.
